VERIFIED**

GIA now issues simplified lab-grown diamond reports without individual color and clarity grades. To ensure transparency and protect true quality and value, Jean Dousset provides an independent grading addendum aligned with historically recognized standards and applied exclusively to gem-quality lab-grown diamonds.

CLARITY SCALE

GIA has updated its lab-grown diamond reports to a simplified format that no longer includes individual color and clarity grades. To preserve the level of detail clients rely on, Jean Dousset provides an independent grading addendum using criteria aligned with historically recognized diamond grading benchmarks. Each diamond is gem-quality, grown under controlled conditions, and assessed for accuracy, transparency, and true value.
